LUNAPRISE MOON MUSEUM

About The Lunaprise Moon Museum

The Lunaprise represents the first-ever certified and authenticated art museum on the moon, which landed at the lunar south pole on February 22nd, 2024. It encapsulates a diverse array of art and technology projects. This artist certification summary details the lunar art museum mission, its objectives, key participants, and the inaugural collection of 222 artists and cultural artifacts included in the Lunaprise time capsule.

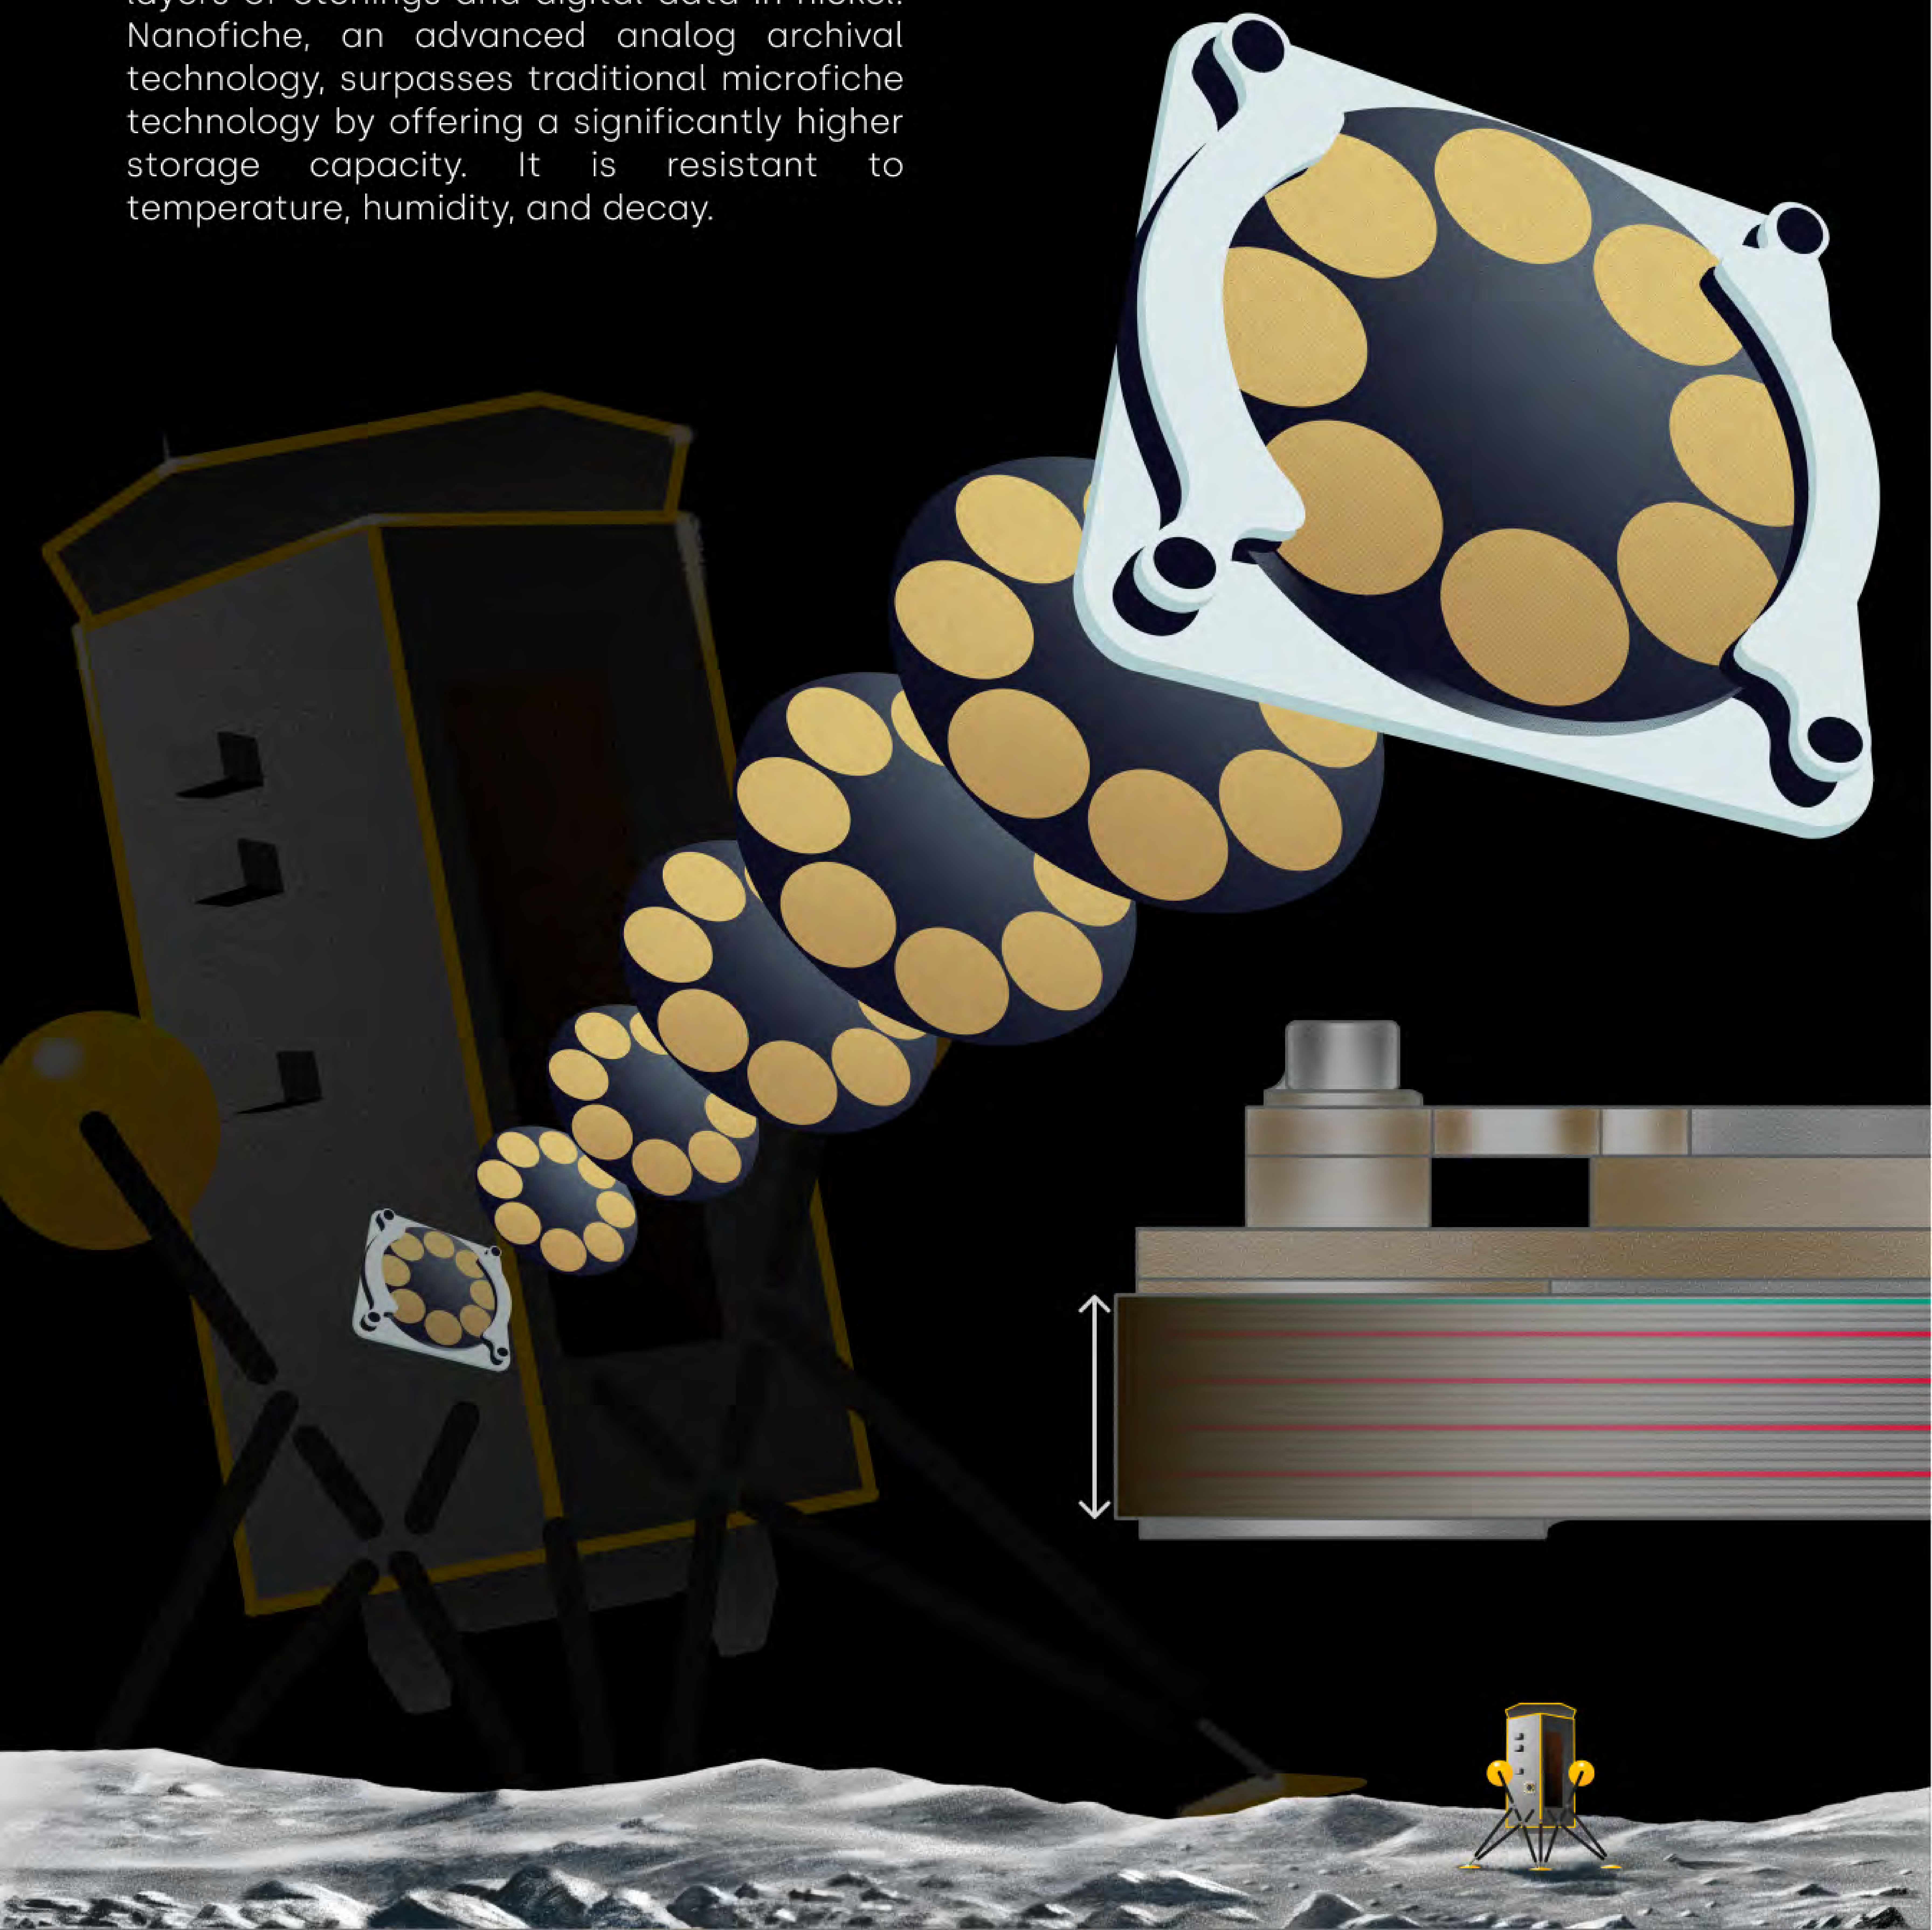

LUNAPRISE MOON MUSEUM

Nanofiche™ and Digital Data in Nickel

Technologically, the Lunaprise features a Nanofiche artifact, which consists of many layers of etchings and digital data in nickel. Nanofiche, an advanced analog archival technology, surpasses traditional microfiche technology by offering a significantly higher storage capacity. It is resistant to temperature, humidity, and decay.

LUNAPRISE MOON MUSEUM

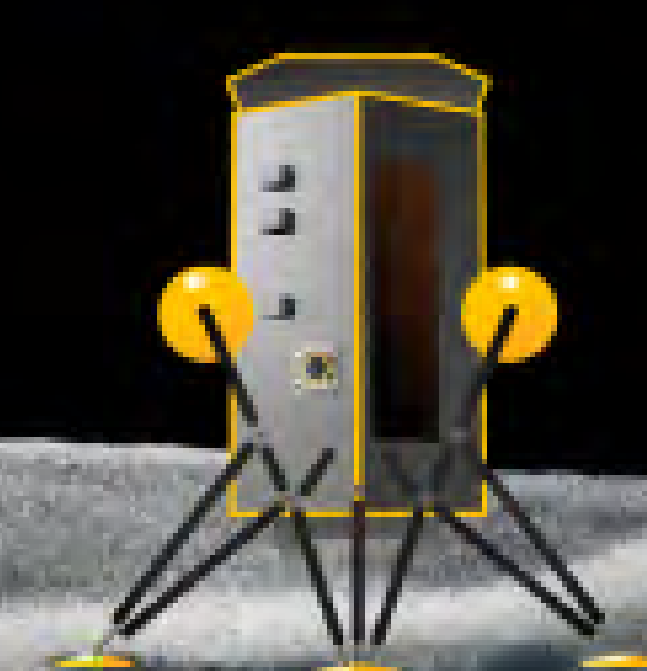

222 Artists & Projects Etched and Archived

Lunaprise is an indestructible time capsule filled with humanity's and Earth's cultural and artistic achievements. Its landmark landing achievement immortalizes a vast array of creative works from 222 iconic artists across multiple disciplines, including fine art, digital art, music, and film. The initiative not only celebrates human creativity but also ensures that our legacy and knowledge endure for future generations to discover. It is designed to last billions of years in space.

Single Sheet

LUNAPRISE MOON MUSEUM

The Lunaprise Curation Journey from 2019 to 2024

The genesis of the Lunaprise project was rooted in the archival of knowledge—a visionary endeavor aimed at preserving the breadth of human understanding and creativity for eons. The initiative sought to encapsulate a wide array of data, from scientific discoveries and historical records to personal mementos, ensuring that the legacy of humanity would be safeguarded against the vicissitudes of time and space. This archival mission, driven by a commitment to eternal preservation, laid the foundation for a project that would soon evolve beyond its initial scope.

With the introduction of Lunagrams in 2020, the project embarked on a novel phase. This innovative service offered individuals the unprecedented opportunity to send personal artifacts—a photo, text, music, or video file—to the moon. These Lunagrams, though personal and varied in content, were initially not conceived with the intention of curating art. With over 1,000 Lunagrams, they represented a bridge between the individual and the cosmos, allowing private sentiments and expressions to be eternally etched into the lunar landscape.

The turning point in the Lunaprise journey came with the involvement of Space Blue as curator. Under Space Blue's stewardship, the project underwent a remarkable transformation. The focus shifted from the broad archival of knowledge to a more refined curation of art and cultural collections. This pivotal change heralded the integration of works from a combined 222 artists and projects into the Lunaprise, marking a new era of lunar art curation. Despite this shift towards art curation, Lunagrams sent by the public maintained their privacy, with the contents shared only at the discretion of their creators.

Parallel to this artistic voyage, the Arch Mission Foundation continued to maintain its distinct archives, separate from the Lunaprise's curated projects. These archives remained true to the original vision of preserving a diverse spectrum of human knowledge and creativity. Unlike the curated art within Lunaprise, the Arch Mission Foundation's archives were not developed as collectibles or curated art projects. Instead, they emphasized a comprehensive approach to archiving, ensuring that the tapestry of human achievement, in its broadest sense, would be available for future generations to discover and explore.

This journey—from a universal archive of knowledge through the personal expression of Lunagrams, to the curated museum under Space Blue's guidance—illustrates the dynamic evolution of the Lunaprise project. It is a testament to humanity's enduring desire to reach beyond the confines of our world, securing our legacy and creativity on the canvas of the cosmos.

LUNAPRISE

10 FEATURED PROJECTS OF HISTORIC FIRSTS

This section highlights the groundbreaking art and cultural projects that represent significant "firsts" for the Lunaprise Mission, marking notable contributions to the lunar art museum.

First Bitcoin Ordinal Art Project:

- **Artist/Project:** Marshmello The Moon Pup aka Cryptopup
- **Details:** This pioneering digital art project, based on a real-life pet dog, ensures "man's best friend" leads humanity in space exploration. Marshmello The Moon Pup's 1111 art pieces, sent to the moon, will last over 1 billion years and amaze future lunar visitors, guiding lunar colonization like a modern "Sphinx" ahead of Artemis' explorers. The "Marshmello to the Moon" project was also immortalized in a new medium when 11 pieces, depicting the dog in a NASA-like astronaut suit, were inscribed as Bitcoin Ordinals in 2023, becoming the first Bitcoin ordinal project to land on the moon.

First Art History Museum on the Moon:

- **Curator:** Dallas Santana
- **Collection:** "From Leonardo da Vinci to Leonardo DiCaprio: 5 Centuries of Art," featuring 100 pieces that metaphorically span the evolution of art over five centuries.

First Feature Film Bitcoin Ordinal Project on The Moon:

- **Film:** "The 9th Raider"
- **Creator:** Dallas Santana, featuring a unique collaboration with Space-Art+ NFT influencer "CL7," marking the first feature film project inscribed as a Bitcoin Ordinal and the first feature film to be archived on the moon.

First Documentary Film:

- **Film:** Climate Refugees Documentary + Art
- **Creator:** Michael P. Nash, marking the first documentary film project to be archived on the moon.

First Music Archive on Moon:

- **Collection:** Lunar Records
- **Details:** A compilation of 777 top songs of all time, with a special focus on the Woodstock era and the "Summer of Love" featuring the top 30 music artists from that period.

First Numismatic Collection:

- **Collection:** Numismatic Rare Coins Spanning the History of Coinage including rare coins of The Bible.
- **Curator:** NFT Blue, showcasing a vast collection of rare coins.

First Rare Stamps of the World on the Moon:

- **Collection:** Curated by NFT Blue, representing the first comprehensive collection of rare stamps.

First Sports Hall of Fame on Moon:

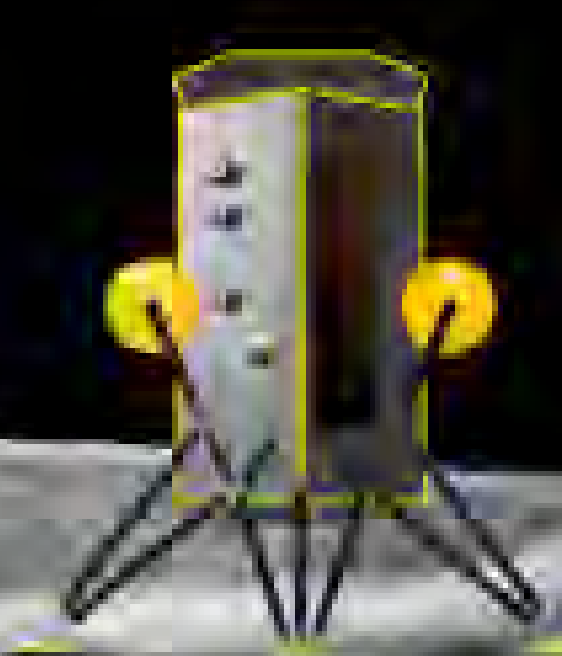

- **Collection:** 400 Masters Of Sports
- **Curator:** NFT Blue, documenting the achievements of sports legends.

First Stan Lee Art Collection on Moon:

- **Collection:** Stan Lee - Legion5 Franchise with Lee Baker/Advent Entertainment, LLC
- **Details:** A tribute to Stan Lee's legacy and art in the Legion Universe, digitized and stored as a Bitcoin Ordinal in 2023.

First United Nations SDG Art Installation:

Initiated by BitBasel with 22 artists tied to Sustainable Development Goals (SDGs), highlighting global sustainability through art.

LUNAPRISE GENERAL MISSION DETAILS

LUNAPRISE IS THE FIRST AND ONLY DIGITAL PAYLOAD VERIFIED IN PUBLICATIONS BY NASA AND THE LANDER COMPANY.

We believe no other payload has been sent to the moon with digital and metallic inscribed artifacts and that we are the only and first payload listed and published on both NASA's website and the contractor who landed the first USA payload on the moon since 1972 (Intuitive Machines IM-1). Reference links to such verification are attached hereto. As the only official payload for digital artifacts and art, we will refute any false claims by third parties. It is our position that only the artists certified on this document have achieved this historical first. Our authority emanates from the assertion that we are the sole authority of the Lunaprise payload and certify that the below-listed artists are the only official 222 digital art projects to land on the moon on February 22nd, 2024.

Lunar Mission Details

- **Lunar Museum Mission Name:** Lunaprise
- **Mission Organizers:** Galactic Legacy Labs LLC, curator Space Blue, & Arch Mission Foundation
- **Objective:** To establish the Lunaprise as a secure lunar repository in support of a billion-year+ archive, preserving human knowledge and culture for eternity..

Key Dates and Facts

- **Mission Formation:** July 2020
- **Moon Lander Contract:** Secured with Lunar Lander Company and Private Contractor Intuitive Machines in Q4 2020
- **Content Curation:** Final art and content submissions, led by Dallas Santana and Space Blue, were completed in 2023.
- **SpaceX Falcon 9 Launch Date:** February 15th, 2024
- **Launch Location:** Kennedy Space Center, Cape Canaveral, Florida, USA

Participants

- Founding Members of Galactic Legacy Labs: Nova Spivack, Lori Taylor, Lanette Phillips, Chris Habachy (Dallas Santana was added as a co-founder in 2023)
- Key Advisors: Robert Jacobson, Kevin Harrington, and Dallas Santana, among others contributing across various disciplines.
- Founding Member of Space Blue: Dallas Santana

Museum Components

- **Lunar Library Contents:** 77,000 artifacts, including artworks, cultural archives, and personal messages (Lunagrams).

Space Administration and SpaceX

- **SpaceX Role:** Launched the GLL payload aboard Falcon 9, delivering the Lunar Lander Odyssey into space.
- **NASA Role:** Developed the commercial payload program, installed scientific payloads, and provided overall space mission project funding. Galactic Legacy Labs provided private funding as the payload and Lunar Lander were a private-sector initiative.

LUNAPRISE MISSION AND ART VERIFICATION

Featured Artists and Projects (By Curator and In Alphabetical Order)

This section offers a detailed list of the artists and projects involved in the Lunaprise Mission, documenting their invaluable contributions to this monumental endeavor. As of this date, the contributions of 12 artists remain confidential, preserving the element of surprise and respect for the privacy they requested until further reveals. In total, 222 artists form the vibrant tapestry that constitutes the Lunaprise, each contributing uniquely to a diverse collection spanning various mediums and themes.

The initial disclosure focuses on all 222 of these artists, showcasing the breadth of creativity and vision that has come together for this historic project. Whether through digital art, photography, images, music, film, or other forms of expression, these artists have contributed works that not only highlight human creativity but also symbolize our collective aspirations and dreams for space exploration and cultural preservation.

Note: The detailed documentation of every participant ensures comprehensive coverage of the Lunaprise Mission's artistic landscape, immortalizing this endeavor in the annals of space and art history. As the mission progresses additional details about the remaining artists and their contributions will be unveiled, further enriching our understanding of this unprecedented fusion of art and space exploration.

Documentation and Verification

This artist verification specimen sheet, stored as a Bitcoin Ordinal inscription on the blockchain, serves as the immutable record of the Lunaprise Museum artists, its objectives, participants, and the inaugural artists selected. Future versions by curators of Space Blue will update and expand upon this record as the mission evolves and will be stored in the sole custody of the Lunaprise Mission Bitcoin Ordinal Wallet BRC20:

*bc1pesd50828cauthrh4cuhtg0yutgenzc
yp92fw7uwa9w8vunssp7tqgmhz4z*

for validation purposes. No other authority or source shall be relied upon for the accuracy of artist provenance for Space Blue's curated artist projects. Per Space Blue's artist terms and conditions, an artist certification may be revoked and status updated publicly, including in further blockchain updates, for violation of Space Blue Artist Terms and Conditions.

Artists can also be verified here:

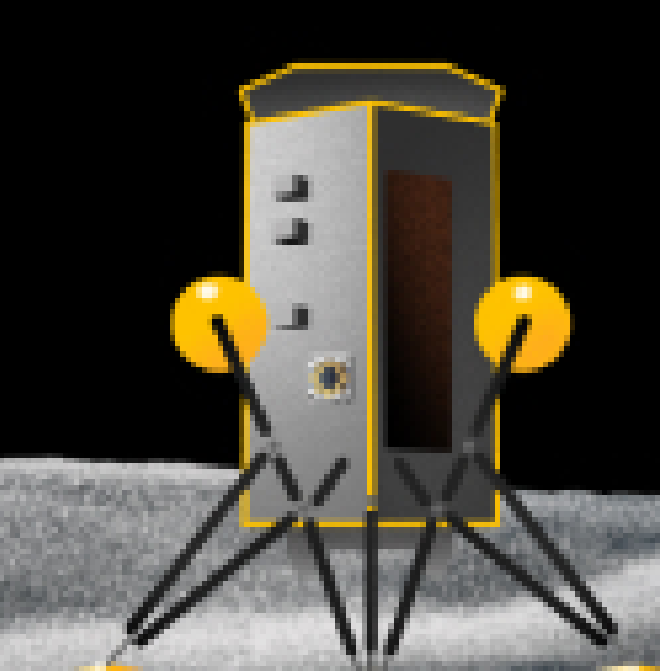

www.verify.spaceblue.club

Version 1.0:

Initial release, detailing the Lunaprise Museum Artists participating at launch.

Future Artifact Editions: Space Blue plans to publish on the blockchain authentication of certain art artifacts contained in the museum. All participating artists are free to publish their own artwork contained in the Lunaprise Museum as physical originals, duplicates, and digital blockchain duplicate editions, but only Space Blue, as the museum curators, shall authenticate and certify the Space Blue curated art projects in the lunar-based museum and artifacts that are stored as twin files in the Lunaprise Museum on the moon.

EXPELLED ARTISTS: We will not certify any artist who has been expelled from the Lunaprise Mission or who has voluntarily quit participation in the mission. We reserve the right to decertify any artist who provides false information or violates the artist participation rules concerning their participation in the Lunaprise program.

LUNAPRISE OTHER CONTENT HIGHLIGHTS

Arch Lunar Art Archive

The Arch Lunar Art Archive seeks to protect human cultural achievements by storing art on the moon, using long-lasting materials for future accessibility.

The English Wikipedia

A collaborative online encyclopedia that offers millions of articles on a wide array of topics, contributed and edited by volunteers globally, making it the largest and most popular edition of Wikipedia.

The Rosetta Project by Long Now

A Project by the Long Now Foundation that aims to preserve endangered languages by compiling an extensive archive, documenting 1,500 languages for future generations.

Panlex Data Sets

The PanLex dataset aims to bridge linguistic gaps by linking translations across a wide range of global languages, emphasizing support for endangered and low-resource languages.

Copperfield's Magic Secrets

The underlying techniques and artistry behind David Copperfield's iconic illusions, encompassing sleight of hand, optical illusions, and intricate stagecraft.

Lunaprise Hall Of Fame

Inscribes the names of the top 100 most influential individuals, creates a sports and music hall of fame on the moon, and recognizes the leading pioneers in space, Web 3.0 innovation, art, and iconic business and spiritual leaders of our time.

Lunarbits

QR codes represent actual physical disk space on the lunar surface, pre-loaded with metadata for current and future digital art and Bitcoin Ordinal NFT projects. These QR codes can be synced with metaverse applications, linking metaverse locations to physical locations on the Lunaprise disks on the moon.

Lunagrams

Initially designed as personal memorials and messages, Lunagrams are sent as singular files, including PDFs, images, or audio/video files. These digital keepsakes offer a unique way to commemorate individuals or moments in time.

Lunar Codex

A small collection of Lunagrams within Lunaprise consists of non-original art and content, making up less than 0.0001% of Lunaprise content. In 2024, the originator of Lunar Codex clarified that their previously reported claim of being a separate payload was incorrect; they are part of Lunaprise. Additionally, the publicized figure of over 30,000 art pieces sent to the Moon has yet to occur as of Lunaprise's landing on February 22, 2024. No artwork or artist in this Lunagram edition of Lunar Codex is authenticated by Lunaprise, the sole and official authority of the Lunaprise payload. This correction ensures transparency and accuracy in Lunaprise's historical record.

LUNAPRISE PARTNERS

Technology Partner

The Arch Mission Foundation focuses on preserving human knowledge and culture by creating long-lasting archives for future generations, stored on the moon and other off-Earth locations to safeguard against global catastrophes.

Payload Partner

Galactic Legacy Labs is dedicated to expanding human understanding and exploration of space, offering educational and entertainment experiences that emphasize respect for human history and responsibility towards future generations.

Curation Partner

SpaceBlue is a global art and technology company, focuses on merging art with space exploration to promote sustainability and humanity. It provides a platform for artists globally and curates the Lunaprise mission.
